## Vertical Shaft Impact Crusher

Zenith Vertical Shaft Impact Crusher is widely applied in medium and fine crushing of all kinds of hard and fragile material like rock, refractory, cement, quartzite, iron ore, etc, especially, in building and road making industries, it has been proved to be the most efficient machine of size reduction in rock and ore processing. Better cubical particle shape of the final products is the outstanding feature when compared to compression machines such as cone crusher. Zenith VSI crusher has been proved revolutionary in capacity improvement and in expense cut of operation & wear parts.

vertical shaft Impact Crusher Feature:

- 1) Cubical shape of product
- 2) Durable structure
- 3) Quick and easy wear parts replacement
- 4) High reduction ratio for all minerals and aggregates

Vertical Shaft Impact Crusher Technical Data:

Model	Max. Input Size(mm)	Power(kw)	Impeller Speed (r/min)	Capacity (t/h)	Weight (kg)
PCL-600	30	2x30	2000-3000	12-30	5600
PCL-750	35	2x45	1500-2500	25-55	7300
PCL-900	40	2x55	1200-2000	55-100	12100
PCL-1050	45	2x(90-110)	1000-1700	100-160	16900
PCL-1250	45	2x(132-180)	850-1450	160-300	22000
PCL-1350	50	2x(180-220)	800-1193	200-360	26000

If there is change of the above specification, it subjects to the newest products' specifications.
